This is the first homework assignment in our history/social studies course. Using your camera phones has become a norm during the. Do you think that with it smartphones have provided a new way of communication and a way to stay connected with your family and friends? Use the following 2 sentences to answer the question of whether you think smartphones have changed the way we communicate and stay connected to our family and friends. We live in a world that changes as fast as technology changes. Do you think that with it smartphones have provided a new way of communication and a way to stay connected with your family and friends? What is your opinion about it? In a recent survey at Minnesota State University-Mankato, 58 percent of college students said that they use smartphones to connect with family and friends. While some students say that smartphones have connected them to their families, others say that smartphones have had a negative impact on their social life. When asked, "What has smartphones changed for you," students shared the following: Some of the benefits. Other benefits. At first, I didn't like using my smartphone, but now I'm addicted. I always have it. The connection between my family and I has grown. It has been hard to connect with my parents and relatives without the smartphone. I have only a limited amount of time to talk to my parents. But, I would rather make a phone call than talk to them in person. I have used my smartphone to communicate with my friends. Many of my friends have given up using a landline because they feel that there is a better way to communicate. Many of us are able to stay connected with our friends and family by being able to text, email, and send images and videos. I think that my smartphone has provided a better way to stay connected with my friends and family. What is your opinion about smartphones? What has smartphones changed for you? This is the first homework assignment in our history/social studies course. Using your camera phones has become a norm during the.
